

APPLIED REGULATORY IMPACT ASSESSMENT (RIA) COURSE

Two Sessions: **3-7 MAY 2010** | **18-22 OCTOBER 2010** | **ROME ITALY**

Jacobs And Associates, LUISS Guido Carli University, The LUISS School Of Government, And The Centre For European Policy Studies (Ceps) Invite You To Participate In Our 5-Day APPLIED REGULATORY IMPACT ANALYSIS (RIA) Training Course On The Principles, Procedures, And Methods Of RIA.

This practical, hands-on course in modern RIA practices has been offered since 2006 by Jacobs and Associates, now jointly with LUISS University in Rome. This RIA course, by highly experienced public policy and RIA trainers, is expressly designed for policy officials and executives who use RIA to improve policy results, and private companies who wish to use RIA methods to communicate with government regulators. The course uses interactive methods to present RIA "in the kitchen," as it is actually done by regulatory officials under cost, data, and time constraints, while preserving the quality of the analysis. Dozens of actual examples from across the world are used in the course. The course will benefit anyone using RIA in environmental, social and economic fields as well as stakeholders such as business associations, NGOs and consultants who want to understand better how to use RIA constructively. **The course is open for subscription worldwide and is presented in the heart of Rome on the LUISS campus.**
